Cryptocurrencies like Bitcoin are extremely volatile and can move or jump in price with no apparent reason due to lack of liquidity and ad hoc news. There is little or no fundamental reasoning behind its pricing and as such trading CFDs in Bitcoin pose a significant risk to Retail Clients. While Axi only quotes Bitcoin between Monday and Friday, Bitcoin can trade over the weekend, meaning there could be a significant price change between Friday and Monday. Bitcoin should only therefore be traded by those clients with sufficient experience to understand the risk of losing all their investment, or more, in a short period of time, and only a very small part of their portfolio should be used.
